DETAILED ACTION

Specification

1. The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. **Claims 1-4 are rejected under 35 USC 102(e) as being anticipated by I' Anson et al. (patent application number 2002/0029172 herein after referred to as "I' Anson").**

I' Anson teaches all the limitations of Claims 1-4. For example, I' Anson discloses a shopping assistance service system to which wireless mobile enquirers can submit inquiries regarding the availability of specified goods or services from local traders (hereinafter referred to as dealers) (see at least

abstract; Fig. 6 (20Q, 20T, 42, 43, 44, 70a-g); page 4, 0055-0064). I' Anson further discloses:

- A plurality of dealer terminals: (see at least Fig. 6 (70a-g); page 4, 0055-0064).
- An information retrieval service: (see at least Fig. 6 (40, 42, 46, 90); page 4, 0055-0064).
- A plurality of user terminals requesting information retrieval: wireless application protocol (WAP) mobile users (see at least Fig. 6 (20Q, 20T); page 1, 0012; page 4, 0055-0064).
- Narrowing search; transmission range: searches conducted based on location of mobile user based on radius searching (please note examiner's interpretation: transmission range of mobile user determines radius of search) (see at least Fig. 7 (83); page 5, 0064 and 0071).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:
